Flag: Follow up

Miranda,

Thanks for discussing the Ayer Creek pilot model with us today. I've revised the scenarios based on our discussion and updated the presentation (see attached). Please let me know if you have questions.

I'm happy to report that there are actually two locations named Schneider's Prairie in Thurston County and the prairie surrounding Ayer Creek isn't an archeological site. Nevertheless Thurston County has conservation efforts that aim to protect prairie habitats.

Lastly, were you able to get in contact with Thurston County regarding additional data? How about Ecology regarding the reason for excluding Thurston County's bacteria data from the TMDL analyses?

Thanks,

Michelle
